The purpose of the Delaware Council of Farm Organizations is to promote agricultural pursuits by encouraging cooperation among farmers and farm related organizations, specifically in regards to legislative policy and regulations impacting agriculture in the state. The Council encourages all organizations and associations representing Delaware growers and producers of farm product to become members.

During the 1970's the Council agreed to be the sponsor of the Agricultural Industry Dinner. The first dinner was held February 1971. It has since become an annual tradition.
